

# TWIN TAP Series 2

Most Advanced Filtered Water Dispenser

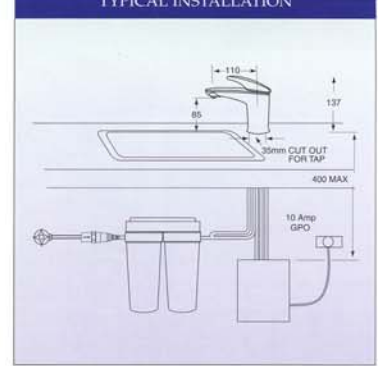

Instant Boiling • Cold / Chilled

**WHELAN** The Boiling Water Specialists

## HOW TO SPECIFY WHELAN TWIN TAP SERIES 2

- To have solid state temperature control.
- To have no solenoid in the water supply (this eliminates a major cause of water hammer).
- Pressure limiting valve with dual filter check valve is supplied as standard.
- Water temperature to 98°C.
- To have anti-flood tap built into the design.
- To have children safe inter-locking button.
- No connection to drain.
- To be installed in accordance with the manufacturer's instruction.

## SELECTION CHART

To select the correct size unit for your needs simply determine how many cups of boiling water are required at any one time, then choose the corresponding model from the chart below.

MODEL NO.	No. OF CUPS SERVED	TOTAL KW	CUP/h. RECOVERY	PHASE / VOLTAGE	HEIGHT mm	WIDTH mm	DEPTH mm
FH 10/2 Ltr	10	1.8	80	1/240	370	195	200
FH 20/4 Ltr	20	2.4	110	1/240	440	195	235
FH 30/6 Ltr	30	2.4	110	1/240	535	195	235
FH 40/8 Ltr	40	2.4	110	1/240	455	330	345
FH 60/12 Ltr	60	2.4	110	1/240	535	330	345

Water Chiller (Optional extra on all models)

MODEL NO.	Ltr per HOUR	H.P.	PHASE	GAS	H mm	W mm	D mm
UWC	6	1/12 th.	1/240	R.134A Env. Friendly	280	385	185

Specifications are subject to change without notice.

1 Litre = 5 x 200 ml cups

### WARRANTY

12 months from date of installation. Filter cartridge is excluded from this warranty as cartridge life is depended on water quality and consumption rate.

10/01

This is why Whelan Twin Tap Series 2 is the best in the world

The Whelan Twin Tap Series 2 using the proven Whelan Thermal Tap® and partnering it with a quality filter system to provide both filtered and boiling water from a single tap. The all Australian designed tap is both elegant and functional and is the only visible reminder that endless supplies of filtered boiling water is only a turn of the handle away.

**Pressure Limiting Valve with Dual Check Valve.**  
The dual check valve is required by law when water filter is fitted for backflow prevention. The pressure limiting valve reduces pressure fluctuations on the boiler and filter housing, thus providing gentler water flow for safer use and increases their life span.

Twin filter manifold is supplied as standard to improve water quality. The addition of the filter will prolong the life of the carbon cartridge or water softener for hard water areas.

- Water temperature to 98°C
- Anti-flood design tap
- No tundish required
- Complete package at affordable price
- Choice of unit size to suit your need
- Child safe interlock button
- Optional integral 24 hour 7 day programmable timer
- Twin filter manifold is supplied as standard
- Pressure limiting valve and dual filter check valve supplied as standard
- Optional water chiller available to suit.

- Reported to be the best under bench boiling water unit in the world.
